

Rahul Ramnor

Dedicated BSc Information Technology student

About Me

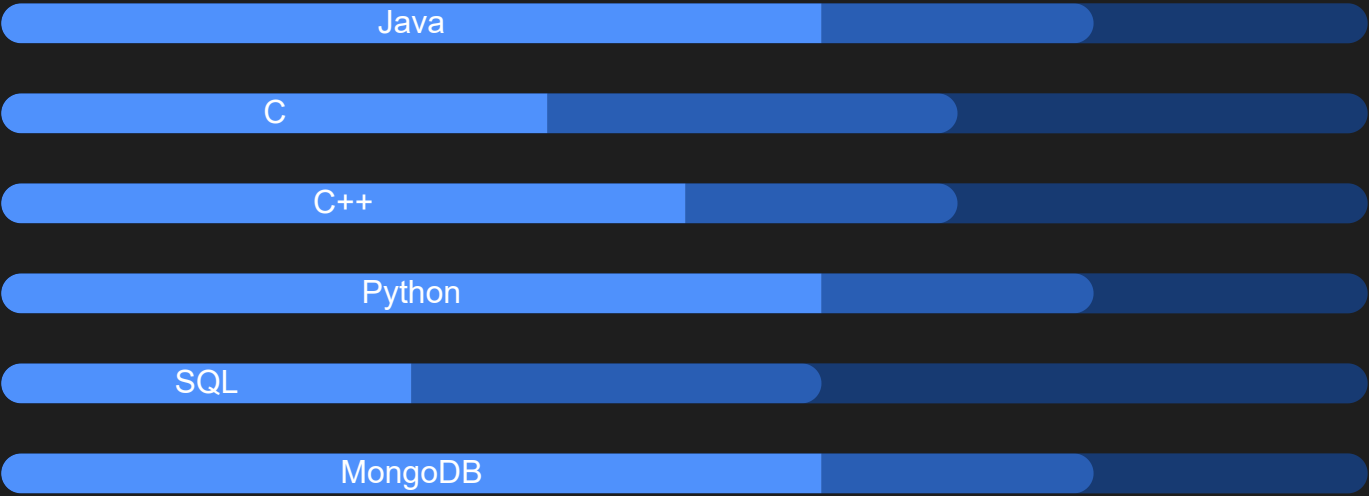

I am Rahul Ramnor, currently pursuing my BSc in Information Technology from Vidyalankar School of Information Technology (VSIT). With a strong foundation in programming languages such as Java, C, C++, and Python, I have developed a keen interest in web development. I am currently expanding my skill set by learning the MERN stack, ReactJS, and Data Structures and Algorithms (DSA) in Java.

My approach to learning and problem-solving is heavily based on hands-on application and a trial-and-error methodology, which has often led to innovative solutions. I have a knack for quickly grasping complex concepts and translating them into practical applications. I am also familiar with databases like SQL and MongoDB, which complements my web development skills.
